

GUILLERMO FREIHERR VON RAUCHHAUPT

Los noventa y cinco años de actual fecunda vida intelectual del profesor Guillermo, barón von Rauchhaupt, celebrados recientemente, no pueden pasar inadvertidos por nuestra REVISTA, en la que nos hizo el honor de colaborar con una de sus más recientes y originales aportaciones al derecho inierespacial—tan relacionado con la moderna política de las grandes potencias—, basándolo precisamente en los fundamentales y universales principios del derecho de gentes español.

El profesor de Heidelberg es uno de los más eminentes juristas extranjeros especializados en nuestro Derecho, que mereció ya desde 1922 y 1923 el honor de ser admitido en nuestras Academias, respectivamente, de Jurisprudencia y Legislación y la Real de Ciencias Morales y Políticas, como miembro correspondiente. Además, por su ingente obra internacional y española, el año pasado fue galardonado con el título de doctor honoris causa por la Universidad Compluense, de Madrid.

Destaquemos de su juventud mental su recentísimo estudio sobre la vigencia de los principios generales del Derecho español, basados en la costumbre y en el derecho natural, y deseamos que su fecundidad sea aún bendecida por muchos años para bien de una humanidad cuyo derecho y política cada vez se relajan más—por su pragmático edonismo—de los principios universales de trato y de convivencia, perturbando la paz interior y exterior de las comunidades humanas.

R. P.

the fact that the *Journal of the American Medical Association* (JAMA) has been the most influential journal in the field of medicine for over a century. The journal's history is a testament to the power of a single publication to shape the medical profession and the public's understanding of health and medicine. The journal's influence is evident in the way it has shaped the medical curriculum, the way doctors practice medicine, and the way the public views health and medicine. The journal's influence is also evident in the way it has shaped the medical profession's self-identity and its relationship with the public. The journal's influence is a testament to the power of a single publication to shape the medical profession and the public's understanding of health and medicine.

The *Journal of the American Medical Association* (JAMA) is a weekly medical journal published by the American Medical Association (AMA). It is one of the most influential medical journals in the world, and its content is widely cited in the medical literature. The journal's influence is evident in the way it has shaped the medical profession and the public's understanding of health and medicine. The journal's influence is a testament to the power of a single publication to shape the medical profession and the public's understanding of health and medicine.
